

Affordable, Effective Anti-Spam Solutions for Education

Roaring Penguin Software provides effective, affordable anti-spam solutions to Universities and Colleges. Our CanIt-PRO product, a robust and highly efficient anti-spam solution, that eliminates the support burden of spam with a powerful cocktail of spam-fighting techniques.

CanIt-PRO allows Universities and Colleges to customize the solution on their servers, then push it out to individual end-users to manage their own spam via a simple web interface.

CanIt-PRO Installation

Look Who's Using CanIt-PRO:

- University of North Carolina
- University of Laval
- Ohio State University
- University of Western Ontario
- Central Michigan University
- Mississippi State
- Ithaca College
- Quinnipiac University
- Rensselaer Polytechnic
- ... and many others!

corporate look and feel. The CanIt-PRO architecture is highly scalable, and is proven in installations of 120,000+ users.

Flexible, Web-Based End-User Controls

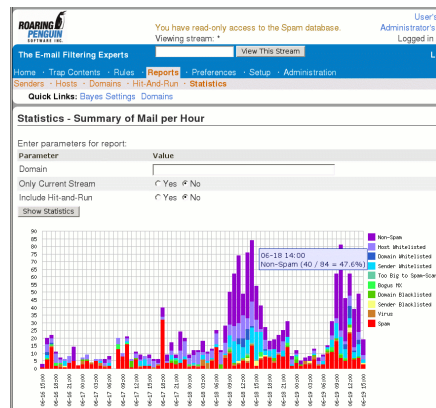

By separating e-mail into private, isolated streams, CanIt-PRO enables Universities and Colleges to give individual end-users control over mail filtering and preferences. Universities and Colleges can customize the end-user interface to suit their service offerings and then let end-users control the day-to-day management of spam. Using a simple web interface that the College can customize as required, students and faculty can opt out, tag spam or exercise greater control over white lists, blacklists and more.

Efficient and Scalable Architecture

CanIt-PRO is an accurate and efficient mail filter, stopping 98% of spam at the mail server without losing a valid message. Because CanIt-PRO is flexible and programmable, Universities and Colleges can easily customize the system for further efficiencies and theme the end-user interface to match

Online Reporting Capabilities

System Administrators can view logs and generate graphical reports.

Anti-Spam Solutions for Education

Flexible Policy Control

CanIt-PRO enables Universities and Colleges e-mail administrators to easily customize the product using a simple web interface to suit each individual school's own mail policies.

With CanIt-PRO, you can choose to:

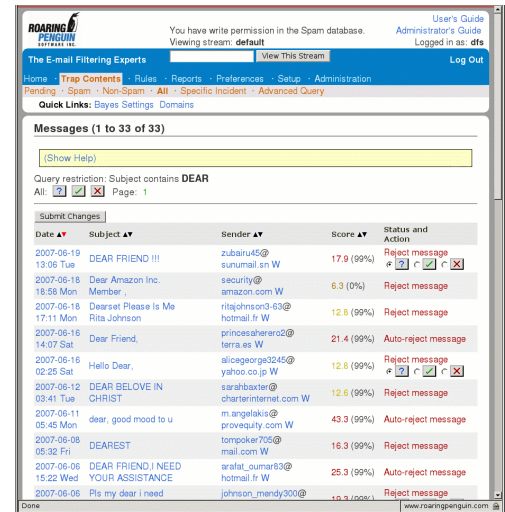

- "Set and forget" with CanIt-PRO's effective default settings
- Filter e-mail for specific attachments, content and viruses
- Customize the spam and virus filters to suit your needs

Anti-Virus Options

CanIt-PRO helps reduce the risk and overall impact of e-mail borne viruses. CanIt-PRO is bundled with Clam AntiVirus for additional protection, and supports more than a dozen popular commercial anti-virus solutions.

Intuitive

CanIt-PRO increasingly reduces the burden of spam e-mail. Over time, CanIt-PRO's Bayesian filters and other anti-spam techniques collect useful and accurate statistics about the e-mail stream, building up resistance to spam and becoming increasingly effective. To get started, CanIt-PRO's default settings have proven highly effective in substantially reducing spam as soon as the product is installed.

Powerful Cocktail of Spam-Fighting Techniques

CanIt-PRO is the most powerful server-side anti-spam solution available to Universities and colleges. It provides complete control of the e-mail environment and one-stop administrative convenience for all spam management activities.

Affordable

Roaring Penguin Software offers special discounts to educational institutions, as well as site licenses and a special competitive upgrade offer.
